

Why CompIntelligence?

Excellence, experience, and efficiency. Our training is designed and developed to provide you with the skills you need to use Hyperion's applications to run your business. People who have trained and used Hyperion products in real business situations develop authentic sample applications and exercises. These same people, with over 30 combined years of Hyperion experience, deliver the courses. Administrators, end users, and users seeking to pass the Hyperion Certification exams will benefit. We teach classes at your site or at any location you choose.

Hyperion System 9 Application Training

Hyperion Financial Management Administrator - 5 Days

Learn how to create and manage applications using Financial Management. Use data grids and forms to create an application and then enter, adjust, and view data. You enter and process journals and intercompany data, load rules, calculate and consolidate data, manage the review and approval process of financial data. Finally, you learn to apply system security to Financial Management data. Hands-on exercises and a case study are provided.

Hyperion Financial Management End User - 3 Days

Learn how to enter, view, consolidate, and manage financial information. Work with a sample application to enter and view data and create and perform journal entries and intercompany transactions. Execute business calculations, perform consolidations, and analyze data using Smart View. Use Financial Reporting to create and view reports. Hands-on exercises are provided.

Hyperion Financial Management Reports - 2 Days

Use Financial Management as your data source and create and manage reports with Financial Reporting. Create reports, report objects, books, and batches. You format reports and add auto calculations and functions. Learn to manage and define permissions for your reports. Hands-on exercises are provided.

Hyperion Planning Administrator - 5 Days

Use Planning to create and administer applications. Learn how to create applications, add dimensions and members, import members, load data, set up security, create data forms, set up task lists, set up calculations, and move a plan through the planning cycle. You also access data offline and analyze plan data. Hands-on exercises and a case study are provided.

Hyperion Planning End User - 3 Days

The course begins with an overview of Planning features, capabilities, and its relationship with Essbase Analytics. You create data forms and task lists, enter and adjust data, define calculations, and move a plan through the budget review and approval process. Use Financial Reporting or Web Analysis to learn how to create management quality reports. Hands-on exercises are provided.

Hyperion Essbase Administrator - 5 Days

This hands-on course provides the techniques and theories for the design of Essbase databases. You create a database outline, load data into the database, and analyze data with Smart View. Learn how to create calculation scripts to calculate data for different scenarios. Hands-on exercises are provided.

Hyperion Enterprise Training

Hyperion Enterprise Administrator - 5 Days

Learn how to create and manage Enterprise applications when you create an application, load metadata and data, create and process journal entries, create intercompany transactions, consolidate data, and create reports. Hands-on exercises and a case study are provided.

Hyperion Enterprise End User - 2 Days

Use a sample Hyperion Enterprise application to learn how to enter and manage data. You enter and load data, create journal entries, create intercompany transactions, consolidate data, create basic reports, and use Hyperion Retrieve. Hands-on exercises are provided.

Hyperion Enterprise Advanced Reporting - 2 Days

Use Hyperion Enterprise Reporting and Enterprise Retrieve to create reports. You create interactive reports, rolling reports, compound reports, reports with financial functions, report sections, and books. You also learn the import functionality, sorting, ranking, and Hyperion Retrieve. Hands-on exercises are provided.

Custom Training

CompIntelligence can create a training program to fit your needs. We meet with your implementation team to understand your application and requirements and then use your application and business processes to tailor the training. Customized materials and exercises are provided and are yours to reproduce for future use. Please contact us for more information.
