

CompXchange™ is moving to the cloud!

You've asked and we've responded. CompIntelligence is pleased to announce that CompXchange™ will be moving to the cloud. Beginning in 2012, CompXchange™ will be available as a web-based *Software as a Service* platform. This new version, CompXchange™ 3.0, implements the very latest technology to provide a faster, more robust solution than ever before. We will be reaching out to every one of our clients very soon for one-on-one discussions of this great new service. In the meantime, here are some of the most common questions regarding our cloud model. In addition, please feel free to contact us at support@compintelligence.com or visit our web site at www.CompIntelligence.com for more information.

Q: Why the need for CompXchange™ in the cloud?

A: CompIntelligence is a leading service provider in the equity compensation business. Our mission has always been to provide state of the art technology to this sector. Since CompXchange™ was first offered 5 years ago, the enhancement most often requested has been to provide CompXchange™ as a *Software as a Service* (SaaS) model. IT directors have been pushing hard for this new model in order to alleviate the burden of installing and maintaining software on user PCs, opening up firewall ports, maintaining network connections, etc. While this is our first official announcement, we have been planning this offering for almost 2 years. Now that our clients have become acclimated to this type of cloud-based application, we feel the time is right and we anticipate a smooth transition.

Q: Will there be an additional fee for using the new cloud model?

A: There will be no additional fees. We encourage all of our clients to take advantage of the cloud model.

Q: How will my current CompXchange™ mappings and settings get moved to the cloud?

A: The CompIntelligence implementation team will handle moving your current CompXchange™ configuration to the cloud, at no cost to you.

Q: Will you still add features to the existing client/server version of CompXchange™?

A: We will continue to support the client/server version for the short term. However, we will not be making any enhancements to the legacy product going forward.

Q: When can I start using the new cloud model?

A: We are currently in beta with a small number of clients. CompXchange™ 3.0 will be commercially launched in Q1 of 2012. If you are interested in participating in the early adoption program, please contact us at support@compintelligence.com or call us at 203-463-4069.

Q: Is my data secure on the cloud?

A: We have invested in dedicated, fully-encrypted servers in our data center. We also enforce secure transmissions and data transfers throughout the entire application, using industry standard encryption methods. Our data center also holds SAS 70 Type II certification to ensure physical security.
