

Financial Systems Consultant

As a consultant within our growing organization you will join a team of dedicated professionals assisting them in the design and implementation of Oracle Hyperion EPM products for our clients. We are looking for an individual with a strong finance and accounting foundation. If you enjoy working with computer software packages like MS Excel, MS Access, Visual Basic or other similar tools and have the ability to apply financial concepts, this is a great opportunity for you to combine these unique skills towards customer solutions and we want to meet you.

Responsibilities:

- Support senior resources in project activities including:
 - Application building and design document execution
 - Documentation
 - Data tie out
 - Report writing
 - Project plan updates
- Work with clients in completing tasks and communicating project deliverables
- Provide support for the clients during and post project implementation
- Provide demo support to our Senior Consultants and Sales team
- Complete assigned tasks timely and accurately while keeping senior finance members informed.

Proficiencies and Background should include:

- Understanding of financial concepts:
 - Financial Close process
 - Budgeting & Planning process
- Strong technical aptitude and passion with regard to computer systems and software.
- Self motivated and ability to excel with training.
- Ability and willingness to learn quickly.
- Strong customer relationship building skills
- Strong written and oral communication skills
- Must be independent yet a strong team player

Qualifications

- BS in Accounting, Finance, Economics
- 5+ years of full time experience in a financial/accounting office
- Big 4 or Audit experience a plus
- Strong MS Excel, MS Access, Visual Basic or other programming language skills
- CPA or MBA a plus, and experience with Hyperion Solution packages, HFM, Enterprise, Planning or other similar software a plus
